CATCHING COLD?

Try this unique aid to nose and upper throat—where most colds start. Its timely use helps prevent many colds.

The remarkable success of Vicks drops has brought scores of imitations. The trade-mark Vapo-Nol is your protection in getting this exclusive Vicks formula.

Just a few drops up each nostril

Assistance Needed

While it is a matter for congratulation that Churchill, the Hudson's Bay port, is enjoying a record shipping season, it is a pity that active steps to promote increased traffic for the route, for the establishment of which the west fought for over 50 years, should be left to "outsiders."

For better than half a century, farmers and business men of the prairie provinces fought against great odds to establish the Hudson Bay route by the construction of a railway line, and terminal facilities on the Bay to handle traffic which they hoped would eventually result in better returns for agricultural products shipped out and reduced prices for merchandise shipped in.

The first objective was achieved in 1932 when the S.S. Pennyworth steamed into Churchill Harbor with a cargo of commodities for sale to the west for Western Canadian consumption and left again with a full cargo of Western Canadian grain for European markets. Since that time there has been an annual increase in the number of inward and outward bound vessels making use of the route until this year, 14 boats have entered the harbor with a possibility that the number would be increased to 16 before the close of navigation.

While, however, these results indicate some progress in the development of traffic by the short and direct route between Western Canada and Europe, the development is not rapid enough to ensure the full benefits which prairie producers and consumers should be reaping from the operation of this great project. If the route is to be of maximum service and benefit to the west, the people of the west, for whose advantage these facilities were devised, must take active steps to promote the use of the service to its greatest possible extent and as speedily as conditions permit.

Recently two notable and interested authorities testified, almost on the same day, that this is not being done; that the people of the prairies are not taking as much interest as they should in speeding up traffic and that, in effect, they are apathetic.

Said R. S. Dalgleish of Newcastle-on-Tyne, England, chairman of the Board of the Dalgleish Shipping Line, which company has operated more boats in and out of Churchill since the inception of the route than any other organization, in an interview: "I do not think that Canada has done enough to develop Churchill and the Hudson Bay route," and added that because of 14 ships entering Churchill Harbor this season there should have been sixty.

The other authority who expressed similar views was A. L. Lawes, vice-president of the Montreal Shipping Company, who, in an interview after a visit to Churchill, criticized the apathy "in many places" concerning the development of the northern seaport.

Coming from the sources they do, these comments indicate that these facilities are capable of providing much greater service to the people of the prairie provinces than they are now doing, provided the people most vitally interested in the development of the route take the necessary steps to ensure the maximum use of them.

As is intimated by another authority, the greatest possible benefits in the way of reduced costs can only be secured by a big volume of business. This is axiomatic in practically all commercial undertakings.

Mr. Lawes told the press that the French Louis Dreyfus and Co. line was shipping out five million bushels of wheat this season through the Bay channel and said that ten million bushels was a reasonable objective for 1937, but he gave a specific instance of loss of traffic as a result of failure to furnish commodities which could have been handled had they been available.

He reported that the Montreal Shipping Company has ordered the steamship "Brandon" fitted out to handle livestock. "However," he added, "arrangements were not begun in time and no cattle were available for the dates on which the ship could come to the port."

It is true that the On-to-the-Bay Association has done much to promote the development of trade via the Hudson Bay route, but the railway line and terminal facilities were completed by aiding successful efforts to secure reduced carrying charges and insurance rates as well as extension of the navigation season, but these efforts must be aided and abetted to the greatest possible extent by government agencies, business concerns, farmer organizations and individuals, if the most is to be made of the new route.

The Hudson Bay route, like Tokyo, must not be allowed to just grow haphazardly, but its development must be accelerated by vigorous effort and alert leadership on the part of all citizens of the prairie provinces.

NOW A Genuine Coleman

LAMP
For Only
\$4.95

300 Candlepower
"Live" Pressure Light

Model 1280
Bottle and
Candle

See how beautiful this is
in action. Lamp has
a pressure gauge and
a pressure valve. When
the pressure is low, the
lamp will not burn. The
pressure is built up by
the action of the pump.
The Coleman Lamp
is the only one of its
kind. It is the only
one that will burn
for hours without
the need of a
pump.

Solves Problem Of Growers

X-Ray Used To Determine Quality Of Vegetables

One of Minnesota's vegetable growers' greatest problems—that of ascertaining the quality of their products—has been solved by a University of Minnesota plant physiologist.

R. B. Harvey, of the university farm, has perfected a method by which he can peer into the heart of potatoes and other agricultural products.

Employing the use of an X-ray and a physician's fluoroscope, Harvey can detect the vegetable with no low hearts and thus rate accurately products by testing samples in large quantities.

Latest Surgical Discovery

Tests Will Show Susceptibility To Shock In Operations

A corner at least of the all-wise dangerous curtain of unconsciousness that hides surgical and post-operative shock was lifted by a physician at the American Congress on Physical Therapy. He revealed for the first time that tests could be conducted which tended to prevent prospective death in cases other than emergency.

Dr. C. Ward Crampton, chairman of the committee of preventive medicine of the New York County Medical Society, discovered that persons whose nervous efficiency (condition of the blood vessels) was dangerously low nearly always experienced marked decrease in blood pressure when made to stand, and a simultaneous and extreme quickening of the pulse.

Dr. Crampton told the medical men with charts he had worked out over a long period of years surgeons could tell with the simple tests whether a patient about to be operated upon would develop shock.

"When the readings are low, but immediate surgery is imperative, the surgeon must expect shock, employ speed, spare trauma and select less severe operative procedure."

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning!

The liver should pour out two pounds of bile every day. If it does not, you will have indigestion, flatulence, constipation, headache, nervousness, and a general feeling of uneasiness. A course of treatment with a liver tonic will restore the liver to its normal state and you will be able to wake up in the morning and feel like a new man.

Raw Asbestos Found

Deposits Discovered Near Gold Fields In Ontario

Deposits of raw asbestos have been found north and south of the gold fields recently discovered 11 miles north of Arden, Ont. It was learned this tiny village of 350 population, continued to attract mining men and prospectors from widely separated sections of Canada and the United States as all reports tended to confirm the optimistic expressions of local residents as to the richness of the new gold fields. The gold vein runs ten miles east and west straight through the bush country, and extends about three and one-half miles in width according to experts.

Continuing over a wide area adjoining the actual vein, first discovered last June by T. J. Alexander and Mervin Newton, local men, they have sold their claims to Hollinger mines. They reportedly received \$75,000. Hollinger engineers also have secured much additional property in the district. Representatives of all other leading Canadian mining companies are on the ground taking up options and buying out right from prospectors willing to sell.

Old Made Good Light

Natives Of Hawaii Used Nuts From Tree

Lumbar or kukui oil, obtained from the nuts of the kukui, or candle nut tree, has been used in the manufacture of some kinds of paint. The candle nut tree is native to Polynesia and is widely cultivated in Asia, Hawaii and the Philippines. Formerly the Hawaiians strung the nuts together on sticks and used them for lighting their houses. Hence the name "candle nut."

In the United States and Canada folks consume approximately seven grapefruit to every 100 oranges.

It is said that half will stretch one-fourth of its own length.

Canada's New Coinage

Reported That New Designs Will Appear On Different Denominations

When Canada's new coinage is issued, one of the coins may gladden the eye of western Canadians. It may bear on the reverse side a grain elevator or a similar prairie scene.

Big changes are being planned in the new coins, which will bear the head of King Edward and which are expected to be issued in 1937.

The head of the king, of course, will be upon one side of the coin and will face to the left. But designs for the reverse side are still under consideration and suggestions are being narrowed down.

The idea is to abandon the traditional wreath of maple leaves and provide a new and different design for each one of the 1, 5, 10, 20 and 25-cent coins.

As a concession to sectional claims and to emphasize the resources and interests in Canada, the designs under consideration are of a wide variety.

One coin will likely show a fishing schooner—the famous Bluenose—another a peak in the Rockies, a third a fish or game subject, and a fourth a grain elevator or some prairie topic.

There is some talk that the 10-cent coin—always an unpopular one—may be discontinued.

The suggested designs will follow that seen upon the recent \$1 silver coin, which bears a canoe paddled by an Indian and a voyager.

Canadian topics have been pictured on Canadian stamps—such as the Bluenose, the peak of the Rockies, a prairie scene of harvesting and others.

War Not Glorified

Is A Cruel And Wasteful Thing, Says Lord Tweedsmuir

Disabled, returned soldiers know that war is a cruel and wasteful thing," Baron Tweedsmuir, Canada's governor-general, told the Amputees Association of the Great War, in annual convention at Winnipeg.

In a brief address, His Excellency said men who had lost a limb or who "may be perfectly happy and comfortable physically, yet this reminder of the war they still always have with them."

"Such men know," he continued, "that war is not essentially a noble, or heroic, or beautiful thing, but that it is a cruel and wasteful thing. So it is they who say to themselves, 'Please God, it shall not come again.' Thus, the amputees men are in a position to inspire real public feeling about the war."

The governor-general was made a member of the association. In pinning his identification badge upon him, Rev. Captain S. E. Lambert, association president, addressed the governor-general as "Comrade Lord Tweedsmuir."

A resolution adopted by the delegates declared civil servants who served in the Canadian Expeditionary Force, and who have not already taken up options and buying out service time for superannuation purposes, should be credited with their military service period as civil service.

Bald headed men may be interested to know that the common fly has color preferences. It dislikes green and red, cannot endure pinks and reds, and prefers orange and white. Primrose petals should be fashionable during the fly season.

Peaceful China

The main stabilizing factor of Asia, in the opinion of Henry L. Stimson, former United States secretary of state, is the "essentially peaceful character" of China.

The leopard is practically the only foe the gorilla fears. The latter sleeps at the foot of a tree to guard his family against this solitary enemy.

After Ten-Year Blindness

Young Man Gets Real Thrill When Sight Comes Back

After ten years of total blindness, Roy K. Kendrick of Bondi, Australia, suddenly recovered his sight while shaving.

Kendrick was blinded in a soccer match in 1926 when he was 22 years old and had reconciled himself to the doctors' verdict that he would never see again.

"When I was shaving," he said, "I felt a strange sensation; my eyes. I thought I could see my face in the mirror, but imagination has played some strange tricks on me in the last few years. I rushed out of my room and saw the sky—blue, with white clouds."

"Then I went back to finish my shaving. I trembled by touch in the way I have learned and then went out into the street. It was all vague, but what I felt could not be described. Scores of things I remember having passed before my eyes. I could see them—and women dressed very differently from ten years ago. I kept noticing things and reading advertisements—anything. Then I ran back to the hotel, overjoyed, laughing, crying and kissing everyone. I couldn't help it. It was difficult to focus at first, but I am getting used to my eyes again. When I want anything my first impulse is to reach out to touch it rather than look."

Departmental Changes

Reorganization Of Several Federal Departments Is Announced

Announcement of the reorganization of several departments of government into department of mines and natural resources confirmed reports that the deputy minister would be Dr. Charles Camsell, now deputy minister of mines. The department will be divided into five units with a director in immediate charge of each. The directors will be:

Mines and geology: John McLean, now director of mines and geology branch.

Lands, parks and forests: R. A. Gibson, now assistant deputy minister of interior.

Survey and engineering: J. M. Wardle, now deputy minister of interior.

Immigration affairs: Dr. H. W. McGill, now deputy minister of Indian affairs.

Immigration: F. C. Blair, now assistant deputy minister of immigration.

The salary of the deputy minister will be \$10,000 a year, and the directors each \$7,500. The reorganization takes effect on Dec. 1, when act authorizing it will be proclaimed. The department will be under Hon. T. A. Crean.

SELECTED RECIPES

BUTTER TARTS

2 eggs
2 cups raisins, currants, chopped
2 cups (atoned) eggs or nuts
2 cups brown sugar
1 tablespoon butter
1 teaspoon vanilla
2 tablespoons milk or water
Purify Flour pastry
Method: 1. Beat eggs, add sugar, butter, vanilla, fruit and milk or water. 2. Line tart tin with dough, cooked pastry place a teaspoon of mixture in each tin and bake in hot oven of 475 degrees for 15 minutes.

Would Simplify Matters

If Motor License Exchange In Empire Was Established

A resolution seeking the co-operation of the Automobile Association and the Royal Automobile Club of Great Britain and the allied automobile clubs of the sister Dominions, in a concerted campaign for the establishment of motor license exchange throughout the British Empire, was unanimously passed at the 23rd annual general meeting of the Canadian Automobile Association at the National Club in Toronto.

It was asserted that the governmental red tape and customs barriers to intra-empire motor touring greatly exceed those relating to travel between Canada and the United States.

Have More Patience

Really Artistic Pictures Are Usually Taken By Amateurs

Amateur photographers produce more artistic photographs than the professionals, says Alex J. Krupp, who was chairman of the committee in charge of the seventh international salon of photography held in Chicago.

"The reason," Krupp said, "is that after spending hours daily on commercial work, the professional has not the patience of an amateur and cannot prevent a certain amount of commercialism entering the picture."

AIR-TIGHT wrapped separately

ROYAL YEAST CAKES are always FULL STRENGTH

GRAHAM BREAD

CINNAMON BUNS

FORM CAKE

Use dependable Royal Yeast Cakes and Royal Sponge Recipes

You can keep Royal Yeast Cakes for weeks—even months—and count on the same fine results whenever you use them. The Champion Chronicle

L. A. STARCK
Editor and Publisher

Thursday, October 1, 1936

On board the tree planting car when it stops here on Tuesday, October 6th, at 8 o'clock in the evening. A programme of illustrated lectures on home beautification, as well as movie scenes of wild life, fishing adventures and comedies has been arranged. No charge for admission to this two hours entertainment.

Don Campbell and Lauretta Clever were among the lucky ones at the Amateur concert held in Carmargy on Friday. Don's prize was for saxophone playing and Lauretta for tap dancing.

Miss Florence Ulrich was a dinner hostess Tuesday evening.

Mrs. J. M. Moffatt was recent recipient of a very beautiful coffee table, presented to her at her home in Lethbridge by members of the Champion Ladies' Aid and Women's Institute. Mrs. Moffatt expressed her delight with the gift in beautifully written letters which were read at the meetings of the Aid and Institute. Mrs. Moffatt was a very active member in the above organizations and the ladies feel a keen loss in her departure. The gift was presented as a token of appreciation and also as a remembrance of cherished friendship.

Lost

Chestnut mare, weighing about 1200 pounds, looks as if in foal. White face and hind legs. Notify G. Farnon at Chronicle office, p. 8.

Local & General

Tillie Fath was operated on for appendicitis in the local hospital Tuesday morning.

Mrs. W. Ulrich was a tea hostess recently in honour of Mrs. Cowell of Lethbridge.

Walter Anderson was operated on for appendicitis in the local hospital on Wednesday.

An old time dance will be held in Alston hall Friday, October 9. Lethbridge orchestra.

Hosery, Silk Lids, sizes 9, 10 all the want d'shades. Special the pair at Campbell's.

Mrs. McKinley of Charesholm was a visitor at the home of Mr. and Mrs. D. D. Farmer last week.

Hereafter all elevators will be closed at 6 p.m. except Wednesdays when they will close at 1 o'clock noon.

Mrs. A. Burnett and children and Mr. Wiles and son of Lomond were guests of Mr. and Mrs. D. Watkins.

Mrs. E. Siler, who has spent the past month visiting in Kelowna, British Columbia, returned to her home, Tuesday.

Apples, finest cooking \$1.40 case and finest eating \$1.69 case at Campbell's.

Mrs. M. G. Clever motored to Lethbridge Thursday, who was accompanied by Mrs. Watkins and Miss F. Ulrich.

Mrs. W. G. Laidlaw of Cardston who has spent the past three weeks in Vancouver returned to her home Monday.

Friends of Mrs. Peter Bow's, sister of G. Stewart, will be sorry to hear that she suffered a paralytic stroke on Monday last and is seriously ill.

Royal Purple Ladies, please note: The next regular meeting of the O. O. R. P. Champion Lodge No. 33 will be held on Tuesday night, October 13th.

Pure Wool Jumbo Knit Sweaters for men, the finest values we have ever shown, at Campbell's.

Mr. and Mrs. W. E. Watkins and Mr. and Mrs. G. K. McLean motored to Cardston Sunday and visited at the homes of Mr. and Mrs. MacKibbon and Mr. and Mrs. Ramsay.

Mrs. H. Frame and Mrs. W. Diemert, who have spent the past week visiting here returned to Kimberley Saturday they were accompanied by Mrs. Andrew Diemert.

All History 2 and 3 students are requested to get in touch with Edna Orr, secretary of I. O. D. E. before October 10th regarding the History prize offered by the I. O. D. E.

A Real Candy program, "Back to Nature" that all the family will enjoy is on deck for the theatre patrons this Saturday night, October 3rd, two shows, 7 and 9 o'clock.

The Champion Ladies' Social Credit group will meet on Tuesday, Oct. 6th, at the home of Mrs. Versluis. Those ladies wishing transportation please be at the church at 2:30.

The church of England congregation will assemble in the Community hall dining room on the 4th inst. at 3 p.m. to follow "A Form of Thanksgiving for the Blessings of Harvest."

The Ladies' Aid of Champion United church are holding a Thanksgiving tea and produce sale in the former Bakery on the afternoon of Saturday, October 10th. The sale will feature seasonable delicacies such as chickens, pies (including pumpkin) doughnuts, and cookies. Mrs. A. Jopling convenes the tea, and tasty afternoon refreshments are assured. Watch for the posters.

Good crowds turned out to see Will Rogers in "Steamboat Round the Bend."

F. Clever received a letter from E. H. Gilbert of Cle Elum, the Washington flier who was forced to land in Champion last summer, stating that he had a friend, Charles Hugg, on his way to Alberta for some bird-hunting. Knowing Mr. Clever's fondness for hunting he felt that he would gladly direct him to some duck and partridge shooting. Mr. Hugg accompanied by R. Turner arrived with his dogs and up to date has enjoyed the duck hunting. He is anxiously awaiting the season for partridge to open Mr. Hugg's final destination is Da'mead, Alberta.

Mutual Telephone Co.

On Thursday afternoon around twenty subscribers on the rural line north of town met in Geo. Mark's office to discuss the question of forming themselves into a Mutual Telephone Co.

Mr. Phillips of Lethbridge of the Alberta Telephone Co. was present and explained the proposition to those present.

This portion of the telephone line can be bought for \$500, on which there are at present twenty subscribers. After discussing it for some time, it was decided to hold another meeting this week to organize the company.

In case of no company being organized the Telephone Co. is prepared to tear the line down. There is still another district to which a similar proposition will be made.

Mr. and Mrs. Levi Ayotte and Richard, who were on their way to Champion to look after crop interests stopped at Spokane on learning of crop conditions here. Mr. Ayotte was unfortunate in contracting smallpox and is seriously ill at a hospital in Spokane.

Old Timer Passes

Largely attended funeral services for the late Henry Zeng, 73 years of age, well-known oldtimer of the Champion district, who died last Thursday following a heart attack were conducted Saturday afternoon at the Nazarene church. Interment followed in Borneal cemetery under the direction of Jacques' funeral home.

Palibearers were: Bowen McDavid, Louis Miller, George Reath, James Barnett, William Bowie and Frank Middleton—Calgary Herald.

(Continued from Front Page)

The winners of the Special Award ribbons were:

Class A—Edward Smith, Champion; Edward Leseack, Harmony; Viola Leseack, Harmony.

Class B—Kenneth Fath, Champion; Edith Leseack, Harmony.

Class C—Walter Kramer, Robert McLean, Pacific Goodlight, Linda Connolly all of Champion.

Class D—Victor Leseack, Harmony; Winnie Mathew, Long Centre.

Class E—Walter Anderson, Champion; Margaret Fath, Champion.

Class F—Dick Laiff, Champion; Anne Leseack, Champion.

The boy's prize for the greatest number of points in Classes A, B and C was won by Kenneth Fath who made 14 points out of a possible 15. Edith Leseack won the girl's prize with 12 points. J. D. Henderson and McIntyre & Co. have very kindly offered to donate the prizes this year.

The individual cups for the greatest number of points in Classes D, E and F were won by Victor Leseack and Margaret Fath. Walter Anderson was a close second for the boy's cup, being one point behind Victor Leseack who made 14 points. As for the last two years, the cups are being donated by Victor Leseack, Women's Institute, and once again we want to thank the ladies of that organization for their very tangible support of school sport.

Attempted Robbery

An attempt was made to enter O. L. Taylor's store at Carmargy Tuesday night, but owing to watchman being on the job, the men were scared away. The police were notified and a hunt instituted, two men were picked up in a car and questioned then released. From later information the two were taken in hand again by the police outside of Lethbridge.

Country Elevators
AND
Grain Marketing

Elevator companies, including the Pools, are members of the Winnipeg Grain Exchange and use it in exactly the same manner and for exactly the same reason. They use it because the futures market is the best method which has been so far devised to protect the farmer and to ensure low handling charges. It is not used by either the Pools or the other elevator companies for the purposes of profit.

The Pooling method, which is the only other method which has been tried to date in Canada, cost the West many millions of dollars. It is no longer seriously advocated, even by those who invented it. If in the future any organization, commission or government can evolve a system of marketing Canada's crop which will consistently return to the farmer even a fraction of a cent more than he obtains through the present methods, the line elevator companies will be the first to endorse and adopt such a system. At the present time all elevator companies (including the Pools) market grain in exactly the same way because it is the best and cheapest way which has yet been devised.

Fair competition is the farmers' safeguard.

Propaganda by the Pools, through the Western Producer, country newspapers and field meetings, attacking the elevator companies because of marketing methods which the Pools themselves adopt, is untrue and hypocritical and merely designed to abolish the competition which is the farmers' best protection.
